

Events Registration

Want to sign-up your church/entity to Events Registration? [Click here](#)

Watch the Getting Started Videos

Features

- Create and customise your event webpage that's mobile-friendly
- Gather the details you need from your attendees
- Sell event tickets, and related tickets (e.g. meal /accommodation/resources): paid/free, with/without GST
- Handles complex events and allows attendee registrations to be edited (e.g. adjust tickets purchased, or add another attendee)
- Processes online payments (Visa/Mastercard) and records offline payments (cash, direct deposit, etc)
- Statements emailed, including tax invoice details/receipts /refunds
- Integrates with accounting software - CMF data export includes project/account/other analysis codes
- Check-in module to keep up to date with arrivals and departures, and customisable lists
- Check-in module allows quick-reference to attendee's responses e.g. for seminar selections, allergies, emergency contact
- And more... see [Events Features](#)

Cost

- The Events Processing Fee is 30c per ticket sold plus 1.5% of the total transaction value.
- Free events = no fee (Free events defined where the total ticket sold value is \$0.00)
- Note that for large free events, there may be a charge applied to offset costs to support that event

Events Registration is the online tool for Event Organisers

It's a web based system where Event Organisers can publish event registration forms and collect registration details and payment. It allows people to fill in their details, register and pay online to secure their place at an event. The Checkin feature allows Event Organisers to conveniently access attendees' registration data, and create custom lists and list labels to track and edit in real-time the collection of resources, shuttle queues, medical flags, special needs, etc.

Check out the tips and hints at [Events Best Practice](#) to help you organise and deliver your event.
